

Accessibility Build

Scope

Page	Why
Home	Hero H1 over image, photos, events table
Admissions	Ordered enrollment steps
Tuition	Main data table
Contact Us	Only form on the site

Methods

I tested everything against WCAG 2.2 AA in Chrome and Firefox. For automated testing, I used axe DevTools, Lighthouse, and the W3C HTML and CSS validators. For manual testing, I used keyboard navigation and zoomed in to 200% and 400% on each page. I also checked the pages at 320px in DevTools, ran a text spacing bookmarklet on each page, checked the contrast for each color pair, and looked at the accessibility tree in Chrome DevTools.

Results

Check	Result
Axe DevTools	0 issues on all 4 pages
Lighthouse Accessibility	100 on all 4 pages
Nu HTML validator	0 errors, 1 section without heading warning
W3C CSS validator	5 container query errors (tool limitation)
Keyboard (tested in Chrome and Firefox)	Skip link works, focus visible on every element, order matches reading order, no traps
Zoom 200/400% and 320px	Content fits; only the tables scroll horizontally, not the page

Text Spacing	No clipping or overlap
Contrast	All text passes. Nav hover and focus failed at first but now pass
Form	Labels, (required) text, hints, autocomplete, native required check
Tables	Hidden caption, thead, scope="col", scroll region
Media and motion	Alt text and SVG title pass, there are no video, embeds or animation. Reduced motion is supported

Tool limitations: axe and Lighthouse did give perfect scores but missed other issues in my log, such as the duplicate titles, hover or focus contrast issues, or list numbering. The CSS validator flagged container-type, container-name, and @container as errors, but this is due to the validator not supporting the container query itself.

Remediation log

Issue	Evidence	Impact	Priority	Fix	Retest
Form had no required state or hints (3.3.2)	Empty form could be submitted	Users have to guess what is needed	High	(required) in labels, required attribute, hints, autocomplete, textarea	Pass, empty submit shows "Please fill out this field"
Focus ring hard to see on white (2.4.7)	2.07:1 contrast	Keyboard users lose their place	High	Navy box-shadow behind the ring	Pass, 11.99:1
Nav hover contrast (1.4.3)	2.42:1 contrast	Hard to read on hover	High	Navy text on tan background	Pass, 6.37:1
Tables overflow at 320px (1.4.10)	Whole page scrolled sideways	Users have to scroll two ways	High	Scrollable wrapper region	Pass, only the table scrolls
Tables missing caption, thead, scope (1.3.1)	Code review	Cells read without context	Medium	Caption, thead, scope="col"	Pass
No skip link (2.4.1)	5 tab stops before content	Extra keystrokes on every page	Medium	Skip to main content link	Pass

Duplicate page titles (2.4.2)	Same title on all 4 pages	Tabs are hard to tell apart	Medium	Unique title per page	Pass
Enrollment steps lost numbers (1.3.1)	CSS reset removed markers	Order is not visible	Low	list-style: decimal	Pass
Section without a heading	HTML validator warning	Confusing landmark	Low	Changed section to div	Pass, 0 warnings

Conformance Summary

Conforms: All 4 pages seem to meet WCAG 2.2 AA based on my testing.

Fixed: The 9 issues in my remediation log.

Limited: In Module 5, I planned custom error messages and a status message for the form, but since this needs JavaScript, the form uses the browser's built-in "Please fill out this field" message instead. I also didn't do a full screen reader pass.

Recheck before release: A full NVDA pass, testing in Safari, and rerunning axe and Lighthouse after any content changes.

AI Disclosure

With the help of Google AI, I was able to find out how to create a bookmarklet to test my capstone with
